Address conflict with temporary license for reentry applicant

Nur 600s need to fix discrepancies with nurse education programs. Dee wants OPLC to be ready for review. We're getting outreach from programs re requirements. How does the board want to receive feedback? Do we have stat auth to approve nurse educators not programs or the other way around. Duplication of accreditation program. Current approval and reviews will move to licensing (not Enforcement). Review NCSBN rules to maybe incorporate into Nur rules.
