Carteret County-Beaufort Airport Authority

Vision

Provide a safe, modern, self-sustaining general aviation environment that will stimulate new, and enhance existing economic, industrial, educational, and recreational growth and opportunities for Carteret County and the Crystal Coast.

Mission

To realize our vision, the Airport Authority must maintain an active and effective leadership role within the community. Through available social media resources, we must effectively communicate our aviation capabilities and how they complement the goals and objectives of Carteret County. We must strive to adopt industry best practices and operate in the most cost-effective manner possible. We must continue to seek out and identify time-sensitive business opportunities through Local, State and National organizations, and be prepared to capitalize on those that are a best fit for our county and our citizens.

Strategic Goals and Objectives

- Maintain an effective leadership / management structure.
- Increase revenue generated by airport operations.
- Establish effective communication with all operators on the airfield and other County organizations.
- Continue to acquire property to extend Runway to accommodate larger aircraft.
- Develop property to provide additional ground lease space.
- Continue to develop potential hangar space for future growth.
- Seek funding opportunities for airport operations and improvements.
- Continue to meet safety, security, legal standards.
- Upgrade runways, taxiways, ramp areas, and airport infrastructure.
- Enhance the appearance, accessibility and community awareness of the airport and its capabilities.
- Continually enhance airport facilities to prepare for the larger, more technologically advanced aircraft.
