Humayun J. Chaudhry, DO, MACP

From the Office of the CEO

Earlier this week, the Advisory Commission on Additional Licensing Models released an initial set of draft recommendations for public comment. The recommendations were compiled in response to a growing number of U.S. state and territorial legislatures interested in modifying traditional post-graduate training requirements for medical licensure of physicians who have completed training internationally by eliminating the traditional requirement for completion of ACGME-accredited graduate medical education in the U.S.

State medical boards and other interested parties are encouraged to submit comments through December 6, 2024. Upon completion of the public comment period, the Advisory Commission will review the feedback and comments received and release its preliminary guidance for formal consideration in early 2025.

Once finalized, the recommendations are intended for state medical boards, state legislators, policymakers and interested stakeholders to help inform those jurisdictions interested in developing or modifying additional licensing pathways for physicians who have completed training internationally. The Advisory Commission was established in December 2023 by FSMB, Intealth, and the Accreditation Council for Graduate Medical Education.

Register now: 'New State Medical Board Member Training,' Oct. 11

Register now for the next session of FSMB's New State Medical Board Member Training program, which will address "Effective Governance and Ethics."
