To: Mr. Phil Zavadil – City Manager
City Council of St Paul

What: Waste Disposal Rates

From: John Bruce – Superintendent of Pribilof School District

Thank-you for your support towards the school's building project to this point. It is great to see and be a part of the continued support put forth by this community and the district towards its students. I am sending this correspondence to ask if it were possible to have the rates lowered for material disposal for our building project? In my mind, it is more beneficial to be able to use some of that money towards our students instead. "In what way" would be a question for input on certainly. As an example, as a school district, we have been asked about the pads for the ground at the new park (such as what is under our swing set for the school). I have stated that we would donate those from what we have available. We are certainly willing to help – this isn't just looking for a lowering of the price. It is our belief that any of this, including the fees, should be done in a way that benefits the students. We appreciate your efforts towards our students and community and look forward to any discussions or questions you may have towards our request.

Sincerely,

John Bruce
Superintendent
Pribilof School District
