GIS Department Report
October 5, 2023

- Quality-checking the City of Dixon Storm Sewer Map layers and publishing them as web services accessible by the users of the City of Dixon Water Department web map.

- Updating Flex Map responder's zones and address points to the most current information provided by the 911 Center.

- Prossessing the property splits and combinations and maintaining the genealogy for each parcel with the parcel administrator software.

- Maintaining and updating land use, zoning, and other GIS layers to preserve consistency.

- Importing Farmland values for all townships to land records software, Devnet, using the 2023 Farmland Certified Values.

- Developing and testing the new enterprise GIS system deployment elements, contents, maps, and apps before going live and making them available to end users.

Respectfully Submitted,
Sami Elarifi
GIS Coordinator
