PROFICIENCY SCORE: Students earn points for scoring Partially Proficient or above on state English and math tests. Higher points awarded for students with greater levels of proficiency. The school’s final score is based on the average points students score.

Considerations: points are deducted if a school tests fewer than 95% of students

GROWTH SCORE: Student Growth Percentiles (SGP) compare each student’s growth to peers who scored similarly the previous year. Students can earn higher points depending on their previous score and level of growth. For example, Minimally Proficient in 2022 and high growth earns the highest points.

EL PROFICIENCY: Points earned based on the percentage of students reaching English proficiency, compared to the results of schools statewide. Schools also receive points for students whose English proficiency improves year to year. Higher points are earned for greater gains.

Considerations: to earn EL points, schools must have enough students to be eligible for both EL growth and EL proficiency. We must have at least 10 AZELLA FAY students to be eligible for growth points.

ACCELERATED READINESS: K-8 schools earn points for improving outcomes in 3rd grade literacy, 8th grade math, attendance, test scores amongst student demographic groups, and the inclusion of Special Education students in mainstream classes.

Considerations: for many schools, there are more points available than are needed to earn the total score.

BONUS: Special education enrollment and proficiency in AzSCI for 5th and 8th grades. Schools who administer the AzSCI can earn up to 3 bonus points based on the schools percentage of students who reach proficiency compared to the statewide average. Schools earn points based on how their schools special education enrollment compares to the statewide special education enrollment percentages.
