RE: Building Code Review Board – Structural Engineering Position

Dear Mr. Mulleavey,

I am writing on behalf of Structural Engineers of New Hampshire to nominate Lily Beyer, P.E as the next structural engineer member of the Building Code Review Board.

Lily holds a B.S. in civil engineering from the University of New Hampshire and a MS in structural engineering from Tufts University. She initially received her Professional Engineering license in New Hampshire on December 1, 2017, and is also holds professional engineering licenses in Maine and Massachusetts.

We understand that Jeffrey Trexler's term as the current member will expire in September, 2025. Until then, Lily would be an "alternate" member, with full rights and voting privileges only in the event that Jeff is absent, pursuant to RSA 155-A:10. Otherwise, she will attend meetings and correspond for transition and learning purposes only.

Thank you for your consideration.

Best regards,
Structural Engineers of New Hampshire

Sean Brown, P.E.
President of the Board of Directors
