**Attachments:** GSG Windfarm Weekly Site Status- Week ending 09.02.2023.pdf

**Importance:** High

Alice,

We currently do not have any open violations or items that Leeward is working on with respect to our inspections.

**Summary of Checks:**

Foundation Removals – All have been 5’ deep or more.

Erosion Control and SWPPP requirements – in conformance with county, state, and federal codes.

IDNR Agricultural Impact Mitigation Agreement – continuing to monitor the requirements stated in the Agreement.

Decommissioning Plan – continue to monitor the requirements stated.

Documenting as-built locations and depths of new underground electrical lines and new windfarm foundations (in-process).

Documenting crop disturbance lines (in process).

**What we are not monitoring:**

The work and travel in the public right of ways.

Worksite safety.

The “nuts and bolts” structural, mechanical, and electrical construction of the wind turbines.

Conformance with agreements in place between the landowners and Leeward.

Please let us know if you have any questions or require additional information.

Sincerely,

**Mark Painter, P.E.**
