---

Good afternoon,

I am reaching out to ask about the delegation of valtocono nasal spray for a stable student with a seizure disorder in the school setting. I have read through the NHSNA standards of delegation for school nurses in NH along with the corresponding RSA, NUR and Ed. The standards of delegation includes information about delegating the administration of diastat (rectally) ; all of our students now have valtocono (diazepam nasal spray). Can this medication be delegated as well?

Thank you,

Kelly
