PURPOSE OF POLICY

To recognize ~~the~~ Northwest Florida ~~(NWF)~~ State College's obligation to accommodate students with disabilities with course substitutions when appropriate

LOCAL LANGUAGE

~~NWF~~ Northwest Florida State College recognizes that certain disabilities may preclude a student from successfully completing a specific course requirement for a degree even with appropriate accommodations. ~~NWF~~ The State College recognizes its obligation to accommodate students with disabilities without compromising the integrity of the academic program; therefore, in accordance with State Board of Education Rule [SBR 6A-10.041](#), the following policy is established for providing reasonable course substitutions for eligible students with disabilities as required by Florida Statutes [§§ FS-1007.264](#) and [FS-1007.265](#) and consistent with the Americans with Disabilities Act and other appropriate-applicable laws.

Students seeking a course substitution shall present appropriate documentation to the Director of [Testing and Accommodations](#). Requests for course substitutions will be considered on an individual basis based on the disability documentation and academic record of the student making the request. Documentation must needs ~~to~~ substantiate that the disability can be reasonably expected to prevent the individual from meeting requirements for admissions to the institution, admissions to a program of study, or graduation." ~~The course substitution approval or denial will be made in conjunction with the Executive Director of Academic Records and Enrollment.~~

Procedures for obtaining accommodations are maintained in the College Catalog, the orientation program, academic advisement, the College website, and ~~printed~~ materials available through the Student Success Department.
