

# Princeton Fire & Rescue Dept.

01/09/2023

Patrick McLaughlin  
Radiological Emergency Preparedness Program Administrator  
Homeland Security and Emergency Management  
Minnesota Department of Public Safety

Dear Mr. McLaughlin,

Princeton Fire and Rescue Department has completed the following radiological emergency preparedness activities for the 2023 calendar year:

- Online training for PFRD and external staff as needed.
- Copies of the agencies operational procedures are maintained and reviewed for more efficiency.
- Radiological emergency preparedness equipment has been maintained in an operational state of readiness and is ready for immediate response.
- All alert and notification procedures are maintained in an operational state of readiness.
- All emergency communications systems are tested and maintained in an operational state of readiness.

This serves as the annual letter of certification from Princeton Fire and Rescue Department and the City of Princeton and is being provided to the State of Minnesota ensuring that the annual preparedness requirements of 44CFR 350 and NUREG-0654/FEMA-REP-1, Rev-1 have been met during the calendar year 2023.

Note: We were able to conduct in person training last fall and hope to be able to do it again this year.
